

Useful Android^[1] Apps.

Backups

1.1.1. Easy Backup & Restore

Best of all, so far:

- **Easy Backup & Restore** From Mroid Apps (unavailable from GooglePlay since 2018 but elsewhere):
 - <http://mroidapps.com>^[2]

1.1.2. Swift Backup

<https://androidcommunity.com/swift-backup-brings-rootless-file-backups-for-android-using-shizuku-20211102/>^[3]

https://www.reddit.com/r/Android/comments/qj9wb7/swift_backup_37_adds_android_12_support_and_uses/^[4]

+ Shizuku: <https://play.google.com/store/apps/details?id=moe.shizuku.privileged.api>^[5]

1.1.3. Other partial backup apps

See Android App to Transfer info between 2 phones through files on disk:

- Transfer Calendar data: "iCal Import/Export CalDAV"
- Transfer contacts:
 - DAVdroid (if you have a dav powered server, with OwnCloud/NextCloud, Baikal, ...)
 - "Import contacts CSV TXT XLS" (com.csmatrixit.importcontacts). To be tested, but looks what is needed. url^[6]
or only for name surname and phone numbers (no email or address):
 - "Export Import Excel Contacts". Easy & works nicely.
 - Former app: "~~Contacts Export Import~~" but not recommended since many names and surnames were not preserved

See also this info:

1.2. Email - k9mail

You can export settings and configurations, which will be stored in a file here (by default):

</storage/emulated/0/com.fsck.k9/settings.k9s>

You can use this file to restore the configuration of all your email accounts in a new device using this file.

1.3. Shopping

1.3.1. Amazon Shopping

1.3.2. Ali Express

1.3.3. Carrefour online

1.3.4. Decathlon

1.3.5. Farmasky

1.3.6. Ulabox.com

1.4. Apps for Kids

See Infants - Android apps

1.5. Calendar Import/Export

See Android App to Transfer info between 2 phones through files on disk:

- Transfer Calendar data: "iCal Import/Export CalDAV"

1.6. Contact Import/Export

See Android App to Transfer info between 2 phones through files on disk:

- "Export Import Excel Contacts"

Or former, worse quality of data transferred (losing some fields data in some cases)

- Transfer contacts: "Contacts Export Import"

1.7. GPS & Navigation

- GPS Status
- OSMAnd
- Nokia Here Maps
- Google Maps + Navigation
- Waze

1.8. Weather

- Meteo XL
- Weather Clock
- Weather Underground (WU)
- Rain Alarm

1.9. Public Administration

- gencat
- ivacunes
- infoconsum

1.10. Databases

1.10.1. Android Database

<http://www.surerange.com/>^[8]

A database program for Android. It allows you to easily store your information in Android's built-in databases and view them in a List or Card format. Use it for storing things like your CD collection, wine collection, home inventory, bank transactions, telephone calls, personal information, business contacts or any reference databases you need to access and search regularly.

1.10.2. My Databases

Includes import/export csv.

Free.

1.10.3. MobiDB Lite

MobiDB Database Designer Lite

Including Nested tables, dynamic tables, import/export csv.

Full version: 11€

1.11. Generic

1.11.1. AndroIRC

Android Irc Client (Free Edition)

- <http://www.androirc.com/>^[9]
- <https://market.android.com/details?id=com.androirc>^[10]

1.11.2. BBB-Android

BigBlueButton client for Android.

<https://market.android.com/details?id=org.mconf.android.bbbandroid>^[11]

1.11.3. Calendars: Import/Export

iCal Import/Export CalDAV

<https://play.google.com/store/apps/details?id=tk.drlue.icalimportexport>^[12]

1.11.4. CamScanner

1.11.5. Dock4droid

1.11.6. Drives

To check where is disk space consumed in your device.

1.11.7. FeedGoal

A free RSS reader, to read Tiki resources offline easily.

- <http://code.google.com/p/feedgoal/>^[13]
- <http://feedgoal.com/>^[14]

1.11.8. Memento Database

Memento Database is a highly flexible and customizable personal database management tool. Created for anyone seeking to store various data on their Android devices, the software enables users to create custom libraries with unique sets of data fields, quickly add new entries and, finally, share entries with friends or colleagues, or export them to other systems with just a few taps.

Main features:

- Storing entries with custom fields;
- Sorting, grouping and filtering entries by any fields;
- 19 types of fields: - text, integer, boolean, date/time, rating, currency, image, audio, contact, Google Maps coordinate and others;
- Synchronization with Google Docs.
- Importing and exporting CSV files;
- Password protection (encrypt entries using AES-128).
- Charts: Pie, Line, Bar, Columns, Area, Scatter, Stepped Area.
- Reminders;
- Backing up and restoring data;
- Sending entries via SMS, e-mail, and other available services;
- Barcode scanner, creating entries with data and images retrieved from Google Products;
- Any entry in Memento can be published and made available to your friends or worldwide.
- You can keeping track of everything.

See:
<https://play.google.com/store/apps/details?id=com.luckydroid.droidbase>^[15]

1.11.9. Mindroid

1.11.10. One Media Hub

1.11.11. OpenDataKit apps

Open Data Kit (ODK) is a free and open-source set of tools which help organizations author, field, and manage mobile data collection solutions. ODK provides an out-of-the-box solution for users to:

1. Build a data collection form or survey (XLSForm is recommended for larger forms);
2. Collect the data on a mobile device and send it to a server; and
3. Aggregate the collected data on a server and extract it in useful formats.

See:
<http://opendatakit.org>^[16]

1.11.12. Simple File Manager

Simple File Manager to open folders from Syncthing -
<https://f-droid.org/repository/browse/?fdid=com.simplemobiletools.filemanager>^[17]
<https://simplemobiletools.github.io/>^[18]

1.11.13. Sleep as Android

1.11.14. Syncthing

<https://play.google.com/store/apps/details?id=com.nutomic.syncthingandroid&hl=ca>^[19]
As associated file manager to open folders from syncthing, you can install & use:
Simple File Manager -
<https://f-droid.org/repository/browse/?fdid=com.simplemobiletools.filemanager>^[20]
<https://simplemobiletools.github.io/>^[21]

1.11.15. Twilight

1.11.16. WebDAV File Manager

There are many apps that claim that they can manage webdav-powered servers. Tiki requires that the webdav app is able to manage folders with spaces, for instance ("File Galleries"), and not all seem to do it. **WebDAV File Manager** is a small free application that works out of the box nicely with Tiki webdav powered File Galleries.

See:

<https://play.google.com/store/apps/details?id=jp.ddo.shigadroid.webdavfilemanager>^[22]

1.11.17. ZamiaDroid

An opensourced android application that provides a compact tool to integrate new field citations and to create floristic relevés directly on the field, without having to transcribe the annotations later, from a paper format to an informatized format. No more typo errors thanks to the included thesauri. And everything directly integrated with the gps data.

It can be interesting for Tiki since ZamiaDroid allows you to generate your own forms, with your own custom fields, and allows you to save this information in your own db of items. So it would probably be to adapt the source code to make it general enough to provide a mobile version of tracker generator, and feed (sync) tracker items between the android smartphone and the tiki-based tracker.
