

Ransomware

To get prevented against **WannaCry** Ransomware^[1], you can upgrade your Windows os to latest version of the OS to get latest patches, or apply this temporary patch at each reboot:

<https://www.ccn-cert.cni.es/en/updated-security/ccn-cert-statements/4485-nomorecry-tool-ccn-cert-s-tool-to-prevent-the-execution-of-the-ransomware-wannacry.html>^[2]

Or of course, use a more secure operating system such as any distribution based on GNU/Linux^[3], among others.

Alias names of this page:

wannacry | Wanna Cry | Ransom Ware
