Exemple

Interessant veure la lectura del CO2 d'una habitació petita amb finestra tancada (safareig de la cuina on hi ha la caldera de gas per escalfar els radiadors de la calefacció de casa), i les recomanacons que fa el govern espanyol respecte els tipus de ventilació de les aules de les escoles i els efectes esperats en la concentració de CO2 en una aula tipus.

SCK >
```

Disabling sensors

To disable one sensor, you can type in part of the sensor name:

```
SCK > sensor Noise -disable
Disabling Noise dBA
Saved configuration on eeprom!!
```

To enable it, if it's present:

```
SCK > sensor Noise -enable
Enabling Noise dBA
Saved configuration on eeprom!!
```

Deshabilitem el sensor de partícules (el que més consumeix, en teoria, segons la documentació i ens

va dir l'Oscar):

Kit sck10_occs

```
SCK > sensor PMS PM 1.0 -disable
Disabling PMS PM 1.0
Disabling PMS PM 2.5
Disabling PMS PM 10.0
ESP finished booting
SCK >
SCK > sensor PMS PN 1.0 -disable
Disabling PMS PN 1.0
Disabling PMS PN 0.5
Disabling PMS PN 2.5
Disabling PMS PN 5.0
Disabling PMS PN 10.0
SCK > ERROR: Access point not found!!
SCK > sensor PMS PN 0.3 -disable
Disabling PMS PN 0.3
Disabling PMS PN 0.5
Disabling PMS PN 1.0
Disabling PMS PN 2.5
Disabling PMS PN 5.0
Disabling PMS PN 10.0
SCK > ERROR: Access point not found!!
```

Change reading frequency

Some limitations apply though:

- The minimum reading and publish interval is 5s
- The maximum reading interval is one hour
- The maximum publish interval is one hour

If we want to set the reading frequency to 1 sensor read every 30 minutes (1800 seconds), we would set:

```
config -readint 1800
```

However, I did it and no change was shown:

```
SCK > config -readint 1800
-- New config --

Mode: sdcard
Publish interval (s): 180
Reading interval (s): 60
Wifi credentials: not configured
Token: not configured
Mac address:  xxxxxxx
Sanity reset (every 24 hours) is: on
SCK > ERROR
```

But changing at the same time the publishing interval and the reading interval did the trick indeed:

```
SCK > config -pubint 1800 -readint 1800
-- New config --

Mode: sdcard
Publish interval (s): 1800
Reading interval (s): 1800
Wifi credentials: not configured
Token: not configured
Mac address:  xxxxx
Sanity reset (every 24 hours) is: on
SCK > ERROR
```

WebApp Lleugera

Es pot consultar les dades d'un sck concret via una webapp feta per un desenvolupador, que va anunciar al forum de SCK:
https://forum.smartcitizen.me/t/smart-citizen-light-webapp/1723[9]

Webapp lleugera:
https://bensventures.github.io/smart-citizen-light/[10]

API documentation

Veure:
