

You can easily download your own videos of youtube (or even your entire playlists) through the application `youtube-dl` or `yt-dlp`.

- 1. In (K)Ubuntu 24.04
- 2. youtube-dl
 - 2.1. Installation
 - 2.2. Usage
 - 2.3. Looking for a GUI for youtube-dl? youtube-dlg
- 3. yt-dlp

1. In (K)Ubuntu 24.04

In Kubuntu 24.04, I could download playlists with these apps that I could obtain from **Discover** app:

- **Video Downloader**. Its seems to be a nice and simple GUI for yt-dlp, which does all the job in the background for you, just after you paste the playlist url and select whether you want audio or video.
- **UMD4** (Ultimate Media Downloader). However, it seems to be an eavluation version, available for free during 15d
- **Youtube Downloader**. However, it seems to be an eavluation version, available for free during 3d

Other options, from console (youtube-dl, yt-dlp, failed for me for different reasons, even if I could make them work in previous kubuntu versions)

2. youtube-dl

2.1. Installation

In Ubuntu 24.04 - failed

You can download youtube playlist using playlist-dl

In Kubuntu:

<https://snapcraft.io/install/playlist-dl/kubuntu#install>^[1]

In other distros:

<https://snapcraft.io/playlist-dl>^[2]

Commands in a terminal window

```
sudo snap install playlist-dl
```

```
#playlist-dl 2.2 de keshavbhatt (keshavnrrj) installed
```

However, it fails to work:

```
xavi@tricholoma:~/Baixades/Youtube$ playlist-dl

Trampa de traçat/punt d'aturada (s'ha bolcat la memòria)
xavi@tricholoma:~/Baixades/Youtube$
```

In Ubuntu 22.04

I couldn't find youtube-dl, but could use `yt-dlp` (see below)

In Ubuntu 20.04

You can install `youtube-dl` from repositories, even if it won't be updated as frequently as needed sometimes, to get sync with youtube way of working. Therefore, you are encouraged to install through the command-line:

Commands in a terminal window

```
sudo apt update && sudo apt install youtube-dl # install programs from repos if you
don't have them yet
```

```
sudo wget https://yt-dl.org/downloads/latest/youtube-dl -O /usr/local/bin/youtube-dl # get latest version from developers site
sudo chmod a+rx /usr/local/bin/youtube-dl # fix permissions of the downloaded file
sudo youtube-dl -U # update your previous youtube-dl version
```

2.2. Usage

You can download your own youtube playlist with:

Commands in a terminal window

```
youtube-dl -ci "https://www.youtube.com/playlist?list=YOURPLAYLISTID" -o
"%(title)s-%(id)s.%(ext)s"
```

Replace **YOURPLAYLISTID** with your own YouTube playlist id (note it's not your youtube channel ID, but the youtube playlist id). You can get it from the url of a video when shown through it's own playlist. That url might look like:

- [https://www.youtube.com/watch?v=guFSSJTjyZI&list=^{\[3\]}PLM2ch5TKp00dtMZeQCOJQw6BwJ19VDcj4&index=2](https://www.youtube.com/watch?v=guFSSJTjyZI&list=PLM2ch5TKp00dtMZeQCOJQw6BwJ19VDcj4&index=2)
- [https://www.youtube.com/playlist?list=^{\[4\]}PLM2ch5TKp00dtMZeQCOJQw6BwJ19VDcj4](https://www.youtube.com/playlist?list=PLM2ch5TKp00dtMZeQCOJQw6BwJ19VDcj4)

Therefore, the playlist id is that part after **list=** and before any ampersand (&) if any.

In this case: **PLM2ch5TKp00dtMZeQCOJQw6BwJ19VDcj4**

Therefore, this would be the instruction in the command line:

Commands in a terminal window

```
youtube-dl -ci
"https://www.youtube.com/playlist?list=PLM2ch5TKp00dtMZeQCOJQw6BwJ19VDcj4" -o
"%(title)s-%(id)s.%(ext)s"
```

And if you need in mp4 format only (because your tv doesn't accept some webm or mkv codec files, or whatever other reason), you can add these extra params `-f`

`'bestvideoext=mp4+bestaudioext=m4a/mp4'` :

Commands in a terminal window

```
youtube-dl -ci -o "%(title)s-%(id)s.%(ext)s" -f  
'bestvideo[ext=mp4]+bestaudio[ext=m4a]/mp4'  
"https://www.youtube.com/playlist?list=PLM2ch5TKp00dtMZeqC0JQw6BwJ19VDcj4"
```

2.3. Looking for a GUI for youtube-dl? youtube-dlg

There is a nice GUI called youtube-dlg, however, it doesn't seem to be updated as frequently as needed to keep it updated to latest youtube-dl changes (and therefore, with youtube changes).

You might try the GUI Download-DLG, in case it still works for you (if did for me months ago, but not currently, so I had to go to the command line to be able to fetch my own video playlist successfully)

```
#sudo add-apt-repository ppa:nilarimogard/webupd8 # needed once for youtube-dlg  
sudo apt update && sudo apt install youtube-dlg # install programs from repos if  
you don't have them yet  
# refresh youtube-dl from the commands above so that you have the latest version  
installed
```

Derived from:

- <http://www.webupd8.org/2014/03/multi-platform-youtube-dl-gui-youtube.html>^[5]

3. yt-dlp

If youtube-dl doesn't work for you any more (it did fail for me in 2023-10), you can try installing `yt-dlp` from discover app, or through pip, and launch the command with this program

Commands in a terminal window

```
yt-dlp -ci -o "%(title)s-%(id)s.%(ext)s" -f  
'bestvideo[ext=mp4]+bestaudio[ext=m4a]/mp4'  
"https://www.youtube.com/playlist?list=PLM2ch5TKp00dtMZeqC0JQw6BwJ19VDcj4"
```

You can check the version of yt-dlp with:

```
$ yt-dlp -U
Current version: stable@2023.12.30 from yt-dlp/yt-dlp
Latest version: stable@2024.04.09 from yt-dlp/yt-dlp
```

If installed with pip, you will see this message:

```
ERROR: You installed yt-dlp with pip or using the wheel from PyPi; Use that to
update
```

To upgrade you need to run a command out of two, it depends on how you installed it.

If you installed it via pip, use:

```
pip install --upgrade yt-dlp
```

otherwise use:

```
yt-dlp -U
```

Example:

```
pip install --upgrade yt-dlp
