Potencia: 250W

Posición motor: Rueda delantera (modelo 28PD), Rueda trasera (modelo 28PT)

Pulgadas rueda: 28"

Sensor de PAS: Si

Eficiencia: 80%

Descripción del producto

Kit de motor Delantero para convertir tu bicicleta en una bicicleta eléctrica. Un kit eléctrico para bicicleta eléctrica es el conjunto de dispositivos que permiten transformar una bicicleta en una bicicleta eléctrica o e-bike. Los dispositivos incluidos en el kit son: Motor: Motor incorporado en el eje de la rueda. El motor viene ya montado con la llanta, siendo solo necesario poner la protección interior anti pinchazos, la cámara y la cubierta. Ultra silencioso. BLDC Brush Less Discontinued Current. Controlador: Se encargará de controlar y procesar toda la información de los elementos del kit. Sobre él se establecen los parámetros necesarios para el buen funcionamiento, medida de ruedas, velocidad máxima, niveles de asistencia, etc. Mediante unos transistores se envía al motor la información de la potencia adecuada según las necesidades del usuario, sin sobrecalentamiento y evitando que otros elementos como la batería sufran daños. Manetas de freno: Las manetas de freno incluidas en nuestro kit cortan la ayuda del motor instantáneamente al ser presionadas. Son un elemento de seguridad indispensable para que no se acelere mientras se frena. También están preparadas para frenos de disco. Acelerador (opcional): Permite acelerar la bicicleta sin necesidad de pedalear. El uso de acelerador en e-bike no está autorizado para circular por vías públicas. No cumple la norma PEDELEC EN15194. Sensor PAS: Se instala en el eje del pedalier, es el sensor que detecta la velocidad y el pedaleo enviando así la señal al controlador que dependiendo del nivel de asistencia en el cual lo tengas programado se activará el motor aplicando dicha ayuda. Display/Pantalla LCD: Podemos configurar nuestro kit eléctrico además de darnos información sobre la marcha tales como la velocidad, el nivel de batería, nivel de asistencia, etc.

Contenido de la caja

2 Manetas de freno, 1 Sensor PAS, 1 Acelerador, 1 Display LCD, 1 Controlador, 1 Motor BLDC

1.3. Standard eBikes

1.3.1. ELOPS 940 E CUADRO ALTO B'TWIN - Decathlon (1700€)

https://www.decathlon.es/bici-electrica-elops-940-e--id_8379382.html#v2169858^[5]

SUS CARACTERÍSTICAS

PESO

25,9 kg

INFORMACIÓN TÉCNICA

CUADRO

Elaborado en aluminio

La talla M es adecuada para ciclistas de 1,55 m a 1,75 m.

La talla L es adecuada para ciclistas de 1,75 m a 1,95 m.

El aluminio aporta mayor rigidez al cuadro: la transmisión de la potencia del motor se efectúa más

eficazmente para ofrecer un mejor rendimiento.

HORQUILLA

Horquilla telescópica (con suspensión) sin ajustes.

La horquilla amortigua las vibraciones de la carretera. En ciudades que tienen calles con adoquines, la horquilla amortigua los impactos producidos por el revestimiento.

TRANSMISIÓN

Cambio Shimano 10 velocidades mediante una palanca Shimano, muy fácil de usar, pedalier monoplato.

BATERÍA/MOTOR

Motor central 250 vatios (cumple la norma europea).

Par motor de 50 Nm.

Batería 36 voltios / 11,6 Ah. Garantía de 2 años. Cuadro de mandos con 3 modos + un modo "walk" para bajar de la bici y llevarla al lado.

Autonomía de 50 a 90 km. La autonomía depende del peso del usuario, del uso, de la pendiente, de la temperatura exterior...

FRENOS

Frenos de disco hidráulicos TEKRO delante y detrás.

Los frenos hidráulicos aportan mayor potencia y progresividad con un menor esfuerzo muscular sobre las palancas.

SILLÍN / TIJA DEL SILLÍN

Sillín muy cómodo y tija del sillín de aluminio.

NEUMÁTICOS/RUEDAS

Rueda de 28 pulgadas con llanta sólida de doble pared, 36 radios.

Neumáticos Schwalbe Energizer diseñados especialmente para bicicletas eléctricas. La calidad del componente asegura una escasa resistencia a la rodadura y un excelente agarre para un nivel de seguridad muy bueno, incluso en giros a gran velocidad. Neumáticos con tira reflectante. Neumáticos con sección grande para mayor comodidad.

ACCESORIOS / EQUIPAMIENTO

Portaequipajes con dispositivo para bolsas con fijaciones con autobloqueo, guardabarros, protector de cadena, caballete de aluminio especialmente concebido para soportar el peso de una bicicleta eléctrica, timbre. La bicicleta se entrega con el cargador.

ALUMBRADO

Alumbrado LED 20 lux integrado en el cuadro para ver a 45 m y ser visto a 150 m por detrás. El alumbrado se acciona desde el manillar.

Energía suministrada por la batería.

PESO

Peso en la talla M: 25,9 kg.

CONSEJOS DE CUIDADO

La presión de inflado de los neumáticos disminuye con el tiempo. Es normal: una cámara de aire de bicicleta es ligeramente porosa. No olvides comprobar y controlar regularmente la presión de los

neumáticos. Rodar desinflado reduce la autonomía de la batería, aumenta el esfuerzo de pedaleo y favorece los pinchazos. Para cualquier intervención en la bicicleta eléctrica (limpieza, mantenimiento eléctrico o mecánico), debes retirar la batería y dejar la bicicleta sin tensión eléctrica.

COMPOSICIÓN /CONSEJOS

COMPOSICIÓN

FRAME (FOR BIKE)

Cushion

FAQS

Q1: What makes the ZZMERCK cargo bike company different from other cargo bike manufacturers?

A: All the bikes are made-to-order and can therefore be customised to your particular requirements. For example, there are not many bike manufacturers who can supply one of their trikes 3cm narrower so that it can fit through a tight doorway or alter their design to add an umbrella holder or a loop to clip a dog lead to, or paint it any colour, or build a frame to carry a specific cargo or longer to carry a ladder, etc; you get the idea.....

Q2: Do you provide servicing for your bikes?

A: We can provide servicing and maintenance for your Cargo Bike. As our factory located in China, however I appreciate it may be expensive to transport your bike to me therefore I ensure that all of the consumable parts used to build your bike are standard bicycle components that your local bike shop will be able to service. Please contact me if you would like a annual maintenance inspection for your fleet of business cargo trikes so I can ensure that they are in great condition each year.

Q7: Do you accept small order?

A: Yes. We are willing to sell to retailer and individual. We will supply the same service as the wholesaler.

Q9: What is your warranty of the bike?

A: We offer THREE years warranty of the frame,
TWO years warranty for electric kits (motor, display and controller).
ONE year warranty for battery and other parts.
(not including wear and tear parts).
